

Site & Product Selection Checklist

General planning aid | English | Version 1.0 | 15 October 2026

Use this checklist to prepare a commercial mowing or agricultural robotics discussion. It is not an operator manual, safety procedure or confirmation of equipment suitability.

1. Define the task

- ☐ Application: golf, sports, parks, hospitality, landscaping, commercial grounds, farm / orchard / tea garden, or other.
- ☐ Task and desired result: mowing finish, vegetation type and height, or an attachment / integration project.
- ☐ Work area with units; maintenance frequency; operating windows; seasonal changes.

2. Map the site

- ☐ Sketch work zones, access routes, loading points, restricted areas and service access.
- ☐ Measure entrances, narrow clearances, row widths, headland turning room and transport constraints.
- ☐ Record gradient and direction, slope transitions, edges, water, roads, trees and other obstacles.

3. Describe conditions

- ☐ Soil firmness, moisture, loose surfaces, ruts, stones, debris and expected weather exposure.
- ☐ People, vehicles, children, pets, events and how work areas can be controlled.
- ☐ For positioning: sky visibility, trees, buildings, correction coverage and proposed routes.

4. Review the configuration

- ☐ Request the exact model, dated specification, dimensions, mass and supplied cutting / task equipment.
- ☐ Confirm remote control, positioning, perception, override and operator requirements by configuration.
- ☐ For electric versions: confirm battery, charger, energy supply, duty requirements and storage guidance.

5. Prepare support & acceptance

- ☐ Identify operators, training needs, daily inspection documentation and local service arrangements.
- ☐ Agree demonstration conditions, observations, acceptance criteria and unresolved questions.
- ☐ Confirm quantity, destination, timing, supplied accessories, documentation and commercial terms.
